SHARP

Isn't It Time to Upgrade Your Communications with an Affordable A3 Colour Solution?

All the Document Essentials Plus Colour— Now Is the Time to Upgrade

The DX-2000U is ideal for small offices and for departmental use in large companies. Customers looking to install their first MFP or to upgrade from a B/W model will find the full-colour DX-2000U an excellent choice. This affordable A3 solution performs essential document functions—copy, print, and scan—with ease and can accommodate a range of options for customised expansion as your business grows.

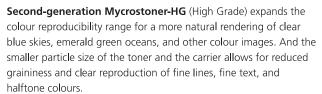

SUPERB IMAGE QUALITY

Selectable Printer Languages

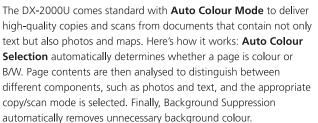

For smooth image reproduction, the DX-2000U supports 2-bit gradation as standard when printing via Sharp Advanced Printer Language-c. The DX-2000U also supports PCL 6* as option. For compatibility with **PostScript® 3™***, the MX-PK11 PS3 Expansion

*Requires optional MX-EB17

Improved Imaging System

Enhanced Scanning and Copying

PRODUCTIVITY

Super-Efficient Output

The DX-2000U delivers a fast output of maximum 20 ppm* in colour and B/W. The first copy comes out in 8.8 seconds in B/W and 10.2 seconds in colour to save valuable time when performing multiple short-run jobs. *A4, long-edge feeding

₽

Versatile Paper Handling 卽 🖺

• The DX-2000U can handle paper up to 300 g/m²*¹ thick as well as extra-long paper up to 1,200 mm*2, expanding the range of possible printing applications.

*2: Requires optional MX-LT10.

Direct Printing*

The DX-2000U can print PDF, TIFF, or JPEG files without using the printer driver. And a USB port (at the rear of the DX-2000U) comes in handy when printing data directly from USB memory devices. *Direct printing requires optional MX-EB17. Direct PDF and encrypted PDF printing require MX-EB17 and MX-PK11.

• Card Shot enables easy copying—in the user-selected size—of both sides of a card onto a single page

The DX-2000U can make two-sided copies and printouts using its built-in duplex module. Adding the 100-sheet RSPF* (reversing single pass feeder) brings even greater copy/scan efficiency. *Requires optional MX-RP18

Job-Build for Large-Volume Scanning 🗦 🗏

The DX-2000U easily handles large-volume copy/scan jobs exceeding the RSPF's 100-sheet*1 paper capacity. For example, a 270-sheet original can be scanned as batches of 100 + 100 + 70 sheets and automatically stored in the MFP's memory*2. Users can then print and/or send the entire document in a single run.

- *1: A4, 80 a/m²
- *2: Entire document might not be scanned if the memory is being used for

EASE OF USE

User-Friendly Control Panel

The DX-2000U is equipped with a **7.0-inch WVGA touchscreen colour LCD** that provides easy navigation of MFP functions and settings. Displaying **thumbnails*** and up-close **previews*** of Document Filing* data files on the MFP's LCD makes file searching easy and convenient. It also lets users confirm scan settings and other items before copying, scanning, or saving documents to the MFP's hard disk*. Thumbnails and previews of incoming faxes can also be displayed on the LCD to help users decide which documents to print out or forward.

*Requires optional MX-EB17.

OTHER KEY FEATURES

For further information on these features, please refer to Sharp's solutions brochure.

MULTI-LAYERED SECURITY

Network Security and Access Control

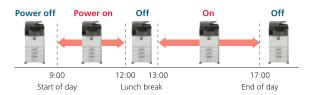

- IP/MAC Address Filtering ensures that only PCs with a registered IP or MAC address can access networked MFPs.
- **SSL** (secure sockets layer) and **IPsec** data encryption technologies ensure secure network communications.
- **User Authentication** covering up to 1,000 users prevents unauthorised MFP use by requiring access passwords.

Data Protection

- Job data is automatically **encrypted*** before being saved to the MFP's internal storage. Once a job is finished, its encrypted data is **erased** by up to 10 automatic overwrites*.
 - *Requires optional MX-EB17.
- Retained data can be initialised when it's time to replace the MFP, preventing the leakage of confidential information.

OUTSTANDING ECO TECHNOLOGIES

 Power ON/OFF Schedule function automatically turns the MFP on or off per administrator-set schedules.

- Based on prior usage patterns, the DX-2000U automatically determines the optimal length of time to let elapse before going into auto power shut-off mode*, helping reduce overall power consumption.
 - *Requires optional MX-EB17.
- Eco Scan function saves energy by keeping the fusing system shut down during jobs that don't require its use.

INFORMATION SHARING -

Multiple Distribution of Scanned Files

You can choose different ways to distribute your scanned documents: for example, send as an e-mail attachment, scan directly to an FTP server for storage, or scan to external memory.

• **Sharpdesk** desktop document management software lets you easily organise, search, edit, and distribute your scanned documents. And **Document Filing*** allows you to save processed job data on the MFP's hard disk for instant recall and reuse.

*Requires optional MX-EB17.

Versatile Fax Functions (option)

- Super G3 Fax*1
- Inbound Routing*² lets you check incoming faxes via e-mail before printing, or forward them to another FTP server, fax machine, etc.
 - *1: Requires optional MX-FX11.
 - *2: Requires optional MX-FX11 and MX-EB17.

EXPANDABILITY -

Sharpdesk Mobile*

Sharpdesk Mobile is a mobile print/scan application that connects the MFP to mobile devices via wireless LAN.

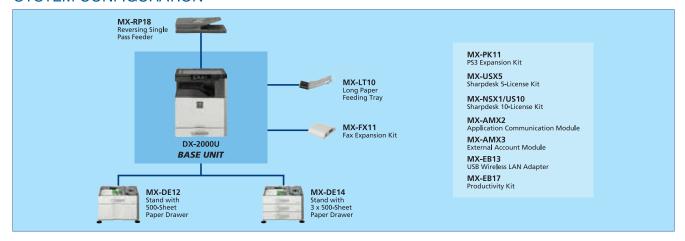

*For details, see the Sharpdesk Mobile support Web site: http://sharp-world.com/products/copier/docu_solutions/mobile/sharpdesk_mobile/

Sharp OSA* (Open Systems Architecture)

Sharp OSA allows integration with cloud-based applications.

*Requires optional MX-EB17 and MX-AMX2 and/or MX-AMX3.

*1: Long-edge feeding. *2: Only short-edge feeding can be used with A5 paper. *3: At rated voltage, 23°C (73.4°F). May vary depending on operating conditions and environment. *4: Requires optional MX-EB17. *5: HDD capacity depends on procurement and sourcing status. *6: Including document cover. *7: Long-edge feeding of A4 sheets from paper tray, using document glass, without Auto Colour Selection and Auto Colour mode, MFP in fully ready condition. May vary depending on operating conditions and environment. *8: Based on Sharp's A4 standard chart, using document feeder, long-edge feeding, and one-sided scanning. Using factory default settings with Auto Colour Selection off. Scan speed will vary depending on the type of document and the scan settings. *9: Resolutions higher than 600 dpi are interpolated. *10: Colour only. *11: Storage capacity will vary depending on the type of document and the scan settings. *12: Some features require option(s). *13: Optional MX-PK11 required for Mac OS and EtherTalk. *14: IPV6 is supported only by LPR righting protocol. *15: PCI. 6 and PostSrcinia? a require potional MX-EB17. As print performance may defen with some printing protocol. *15: PCL 6 and PostScript 3 require optional MX-EB17. As print performance may decline with some types of data, Sharp recommends installing optional MX-EB17 for maximum performance. PostScript 3 additionally requires optional MX-PK11. *16: Based on Sharp's standard chart with approx. 700 characters (A4 long-edge feeding) at standard resolution in Super G3 mode, 33,600 bps, JBIG compression.
